

## **NEW PRODUCT!**

New F-3 Portholes –  
“vintage aged” & ambered  
to exactly match originals!

**New from L & L Model Train Co.** - exact-match “vintage” style aged F-3 ‘snap-in’ portholes – These new portholes are *perfect* for replacing lost, missing, or the old ‘clear’ style reproduction portholes, for your F-3 diesels– and are now standard equipment on ALL our F-3 “A” & “B” restorations!

Our new portholes are EXACT REPLACEMENTS for 1950’s originals – right down to the ‘aged’ color and fit and are virtually indistinguishable from 1950’s stock! We have perfected a method of ambering the lenses so that they are *color-fast* – meaning, they won’t lighten or darken with age! Further, once installed they are *scratch- and nick-proof* and will last forever!

Take a look at the photo of one of our brand new, #2343 Santa Fe F-3 carbody restorations – with our NEW vintage-correct porthole in the rear opening, and COMPARE with the old-style ‘clear’ reproduction in the front! These new ‘vintage-correct’ portholes are EXCLUSIVELY AVAILABLE from L & L MTC and are available *immediately* for separate sale
